

Oydin

Full-Stack developer(React & Node.js)

📍 Tashkent, Uzbekistan | +998 33 355 11 16 | ✉ oydin6661@gmail.com | [in Oydin](#) | [📌 Oydin](#)

TECHNIKAL SKILLS

- **Languages:** JavaScript, TypeScript, SQL, Python (Basic), C (Basic).
- **Backend:** Node.js, Express.js, Nest.js, Microservices, REST API, GraphQL, Socket.io.
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis, Mongoose ODM, Prisma ORM, Sequelize ORM.
- **Tools & DevOps:** Docker, RabbitMQ, Git, GitHub
- **Frontend:** React, Material-UI, Tailwind CSS, CSS
- **IT Support:** PC assembly, Operating System installation, Printer and Network management.

EXPERIENCE

IT Academy / Training Center | Programming & IT Literacy Mentor Tashkent | May 2023 – Mar 2025

- Mentored students by teaching foundational IT concepts and computer literacy, covering essential hardware components, operating systems and basic software applications to build a strong technical base.

“Kelajak” State Development Center | Team Leader Tashkent | Nov 2023 – Aug 2024

- Led a technical team in coordinating IT projects and educational initiatives.
- Managed workflow distribution and ensured project deadlines were met.

346th & 50th General Secondary Schools | Informatics Teacher Tashkent | Sep 2021 – Present

- Taught Informatics and Information Technology to grades 5-11, covering algorithms and digital skills.
- Simplified complex technical concepts, resulting in improved computer literacy among 1000+ students.

EDUCATION

- **National University of Uzbekistan** | B.S. in Computing and Informational Technology | 2018 – 2023
- **ProWeb** | System Administration | 2024 – 2025
- **Najot Ta'lim** | Bootcamp Foundation of Programming & Node.js Bootcamp & Prompt Engineering | 2025 – 2026
- **New Uzbekistan University** | Day of AI Certification | 2025

PROJECTS

Cinema site Cinema Streaming Platform Backend

Built a scalable backend for a cinema streaming platform using NestJS, TypeScript, Prisma (PostgreSQL), and JWT, implementing user authentication, role-based access, movie catalog management, payment & subscription handling, file uploads, and RESTful APIs with DTO validation — enabling personalized recommendations and secure transactions.

LMS Learning platform (LMS) built on NestJS

- Courses, sections, lessons, tests, assignments and user management modules
- Authentication via JWT, role-based access control and caching with Redis
- Cloudinary, SMS and email sending functions are available
- Works with a database using Prisma ORM

This project includes a modern backend architecture and automation of the educational process.

Youtube_clone `Youtube\_clone` is a video platform

Built on NestJS and Prisma, and includes features such as user registration, authorization, video upload and management, video likes, and comments. The project uses file storage via Cloudinary, real-time comment/like message management via WebSocket, and the NestJS module architecture.

Technologies: NestJS, Prisma, PostgreSQL(prisma), Cloudinary, WebSocket, TypeScript.

CRM Customer Relationship Management

Developed a comprehensive Student Management CRM backend using NestJS, TypeScript, and Prisma ORM. Implemented modules for user authentication, attendance tracking, course and lesson management, homework assignments, and student group handling. Utilized Docker for containerization and PostgreSQL for data persistence.
